

VINEYARD NOTES

Giovanni Blason Wines

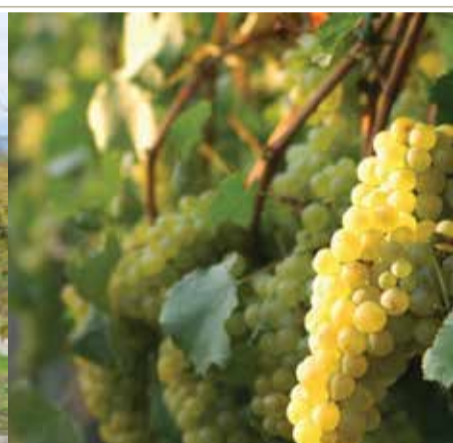

DOC Friuli Isonzo

In the Friuli-Venezia Giulia region of northeastern Italy, located on the border with Slovenia and Austria, lies Blason Wines and their 18 hectares of vineyards set in unique terrain in the sub-region Friuli Isonzo. In this region, before the Isonzo River flows into the Adriatic Sea it forms a plain particularly suitable for growing vines, as the soil is rich in limestone, pebbles, and iron minerals, which also gives it its particular reddish color. It is perfect for the vines to take hold and express their maximum potential. The climate, whose severity of the winter season is mitigated by the sea breeze and the eastern Alps, together with the soil, create an excellent terroir for the production of well-structured, aromatic, white wines with bright minerality, and fresh, fragrant red wines with a high concentration of fruit and aging potential. The techniques Giovanni uses in cultivating the vines respect the principles of sustainable agriculture, where man and nature complement each other.

Vinea Imports is proud to offer four white wines from Blason Wines, listed below.

Thank you for being a part of our community.

Ciao! *Vinea Imports*
